# BMC AMI Database Advisor for IMS Learning Track: Database Administrators (DBAs)

WBT  
Web-based Training

CERT  
Certification

ILT  
Instructor-led  
Classroom/Online

ASP  
Assisted Self Paced

**Recommended for:** Database Administrators (DBAs)

**Product version:** 3.2

The BMC AMI Database Advisor for IMS provides various services to help monitor, analyze, and optimize IMS database performance and availability. It assists database administrators and support teams by identifying performance issues, monitoring database health, and providing actionable recommendations for optimization. Database Advisor works with supporting processes to collect and analyze database and environment data, then recommend solutions to resolve identified issues. These collect, analyze, and solution processes are governed by user-defined parameters and schedules, with BMC providing recommended default settings to enable quick adoption. The defaults help new DBAs get started easily, while experienced DBAs can customize parameters and schedules to better suit advanced data management needs.

BMC AMI Database Advisor  
for IMS 3: Core Concepts  
(WBT)  
Duration: **2 Hours**

BMC AMI Database Advisor 3:  
Using (WBT)  
Duration: **2 Hours**

BMC AMI Database Advisor 3:  
Advanced Using (WBT)  
Duration: **2 Hours**

BMC Certified Associate:  
Database Advisor for IMS  
Online Exam  
Duration: **2 Hours**
