

BMC AMI Ops for CICS® Learning Track: System Programmers

CRT Certification ILT Instructor-led Classroom/Online
WBT Web-based Training ASP Assisted Self Paced

About the Product:

BMC AMI Ops for CICS® uses real-time data to show the performance of CICS regions. The BMC AMI Ops for CICS® data collectors sample and measure system workloads or system resources at intervals that you define. This product provides a number of functions to examine a target CICS region for system programmers and operators who need tools to enable control of CICS operations.

About the Training Target Group – System Programmer Responsibilities:

Analyze task information; Execute commands; Correlate current and originating tasks; Start summary and detail trace; Manage multi-region operation

Recommended for: System Programmers

Training applicable to product versions:

BMC AMI Ops Monitor for CICS® 7.2 and 7.3
