

Ali Siddiqui
Chief Product Officer
BMC Software

Ali Siddiqui is chief product officer for BMC Software, Inc. In this role, he has end-to-end responsibility for the company's entire product portfolio, including the BMC Helix suite, Control-M, and its Automated Mainframe Intelligence (AMI) solutions.

Ali brings to BMC more than 30 years of industry experience managing, building, and growing successful software businesses. His roles have included serving as product general manager with full P&L responsibilities and managing business units with more than \$2 billion in revenue.

Before joining BMC, he was the head of AI Ops and IT Ops for Broadcom's Enterprise Software division, and previously led the IT Ops division at CA Technologies. He has also held leadership roles at Cisco, Oracle and VMWare. Earlier in his career, he founded a business that provided real-time personalization for wireless carrier portals, and worked at several Silicon Valley startups, including being part of one which successfully went IPO.

Ali earned a Bachelor of Science degree in electrical engineering from the California Institute of Technology and a Master of Science degree from Stanford University.
